

# MOUNTAIN TREE

Welcome to "Water" 's World

Water. Your Life. Your Soul. Our Mission!

More Than A  
**"PRODUCT CATALOG"**

## *Filter Media Series*

Mountain Tree is a company dedicated to filter media, with over a decade of experience in the industry.

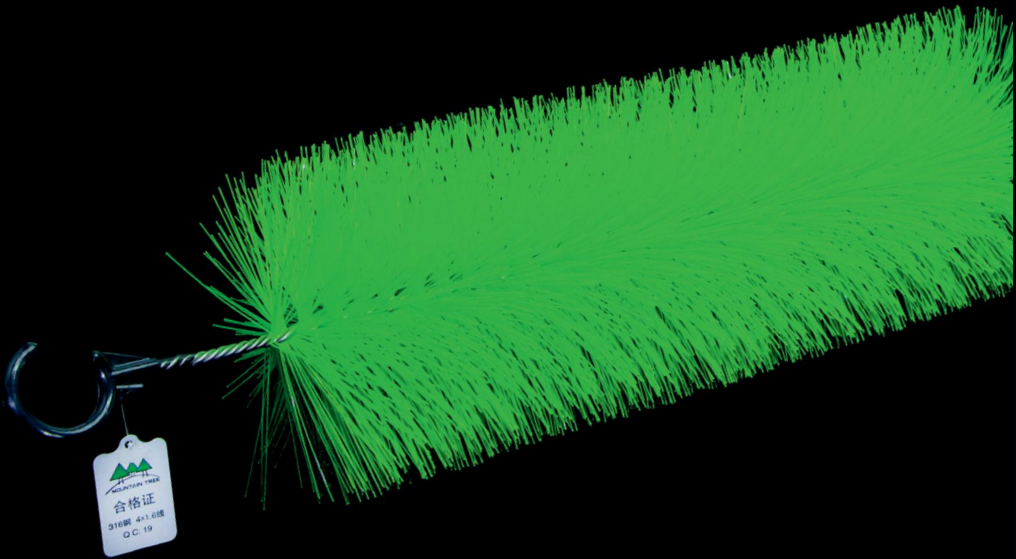

We specialize in the production and sale of a wide range of filter media, covering both mechanical and biochemical filtration.

Our products are designed to meet the needs of fish ponds and aquariums, ensuring clean, healthy water for your aquatic environment.

—— High quality products for all your needs

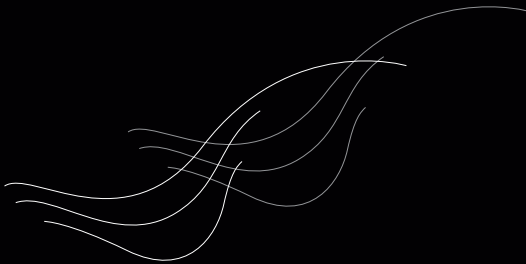

*Water, Your Life, Your Soul, Our Mission!*

## Star Filter Brush

MT patented Star Filter Brush, featuring an innovative six-pointed star filament design, delivers enhanced physical and biological filtration power for your pond filtration.

- Combining mechanical and biochemical filtration.
- Patented star shape filaments offer more surface areas.
- Optimal and recyclable materials make more durable and cost-effective.
- Easy to install and maintain, save your time.

High-quality 304/316 stainless steel

Exclusive patented star shape filaments

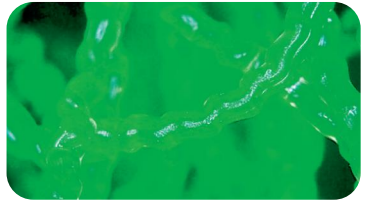

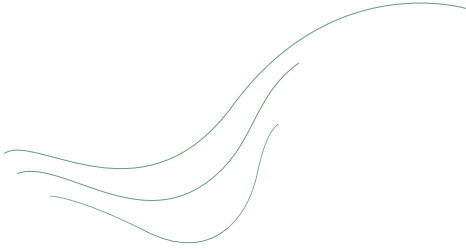

Open hook design for easy installation

# Spiral Filter Mat

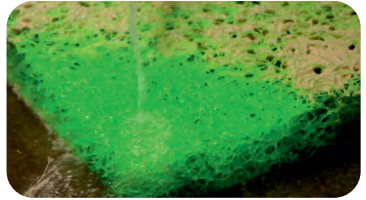

MT Spiral Filter Mat improves the water clarity of your ponds and aquariums with its effective physical and biochemical filtration mechanism.

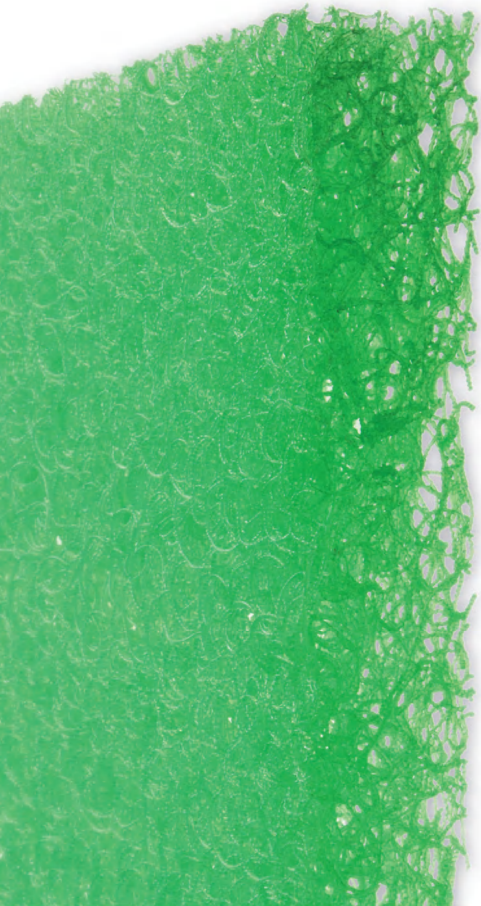

Patented spiral 3D structure provides more surface area

High water permeability

Effortless to clean and maintain

- Outstanding physical & biological filtration performance.
- A patented spiral 3D structure adds more surface areas.
- Designed to reduce clogging problems and replacement frequency.
- Hot-melting for greater durability.
- Easy to customize and maintain.

*Lotus Root*

## *Bacteria House II*

Mountain Tree Bacteria House II features a patented lotus root shape and spiral structure that significantly increases the surface area for effective bacteria cultivation, ensuring unparalleled biofiltration for ponds and aquariums.

- Add 3x more filtration efficiency.
- Microporous structure promotes bacteria cultivation.
- Rich in mineral elements.

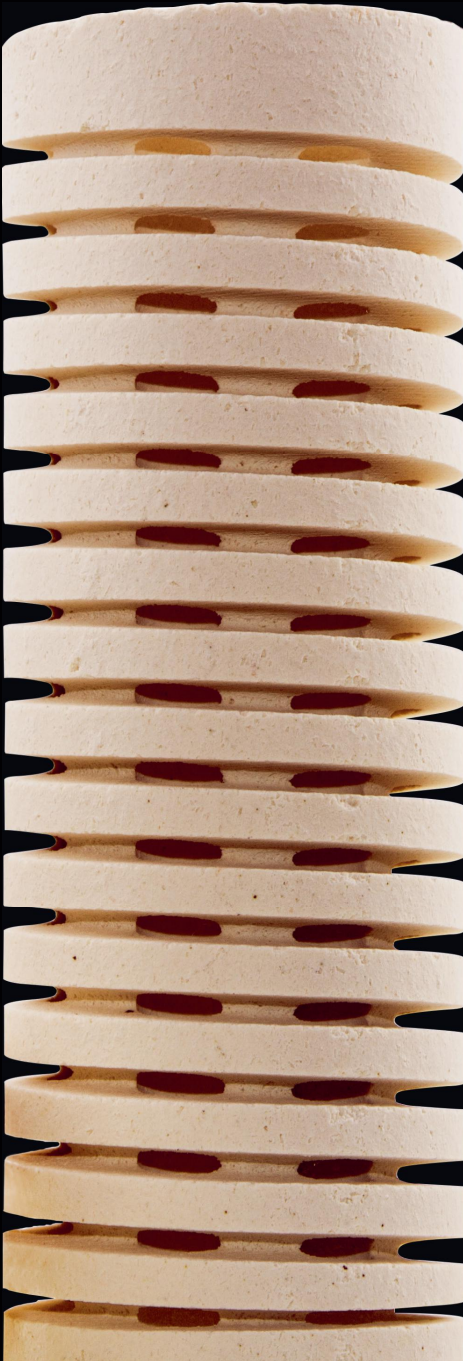

3 times more surface area for more powerful filtration

High water permeability

Patented design  
Lotus root and spiral structure

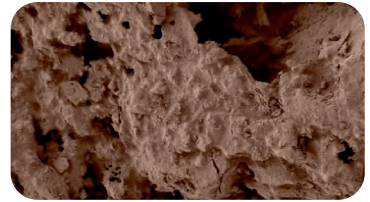

## Lotus Root Nitro Ring

The Mountain Tree Lotus Root Nitro Ring, an enhanced version of Nitro Ring I, features an upgraded Lotus Root Structure that maximizes surface area for bacteria cultivation, boosts filtration efficiency, and is perfect for canister and sump filters in your aquarium.

Patented lotus root structure provides more surface area

The oblique structure diversifies water flow

Easy to install and maintain with a bag package

- The patented lotus root structure provides more surface areas.

- Space-saving design perfect for your aquarium filters.

- Rich in mineral elements.

## Nitro Ring

### Master of Bio-Filtration

- Biofilter partner for aquarium.
- Patented oblique section structure diverse water flow evenly.
- High water absorption rate ensures powerful filtration.
- Micropores are ideal for beneficial bacteria cultivation.

## Mini Ring

### Mini But High-Efficiency

- Fingernail-sized, especially for small-size filters.
- Particular gear shape provides more surface areas.
- High water absorption rate ensures powerful filtration.
- Rich in mineral elements.

## Maifan Ring

### Natural Mineral Supplement

- Rich in minerals, mineral supplies.
- Patented oblique section structure diversifies water evenly.
- String and bag packed, easy to maintain.

## *Filter Pad*

The Filter Pad is made from polymer chemical fiber designed to intercept large particles in water, which is a durable, multifunctional filter media that provides both physical and biochemical filtration, keeping water clear and healthy.

- Dual filtration effects, better filtration efficiency.
- Good in water permeability, not easy to be clogged.
- Easy to cut and customize to your needs.

High water permeability

Washable and reusable

Easy to cut

# Lotus Root Bacteria House & Lotus Root Nitro Ring Marine Version

Designed exclusively for saltwater environments with a low silicate formula, the Lotus Root Bacteria House and Nitro Ring have a superior surface area to achieve a premium filtration performance.

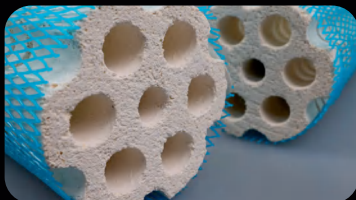

- Choose based on your filter size!

- The lower silicate formula prevents brown algae from blooming.

- The patented lotus root structure provides more surface areas.

- Features porous and rough surface, suitable for bacteria to thrive.

Patented Lotus Root structure provides more surface area

The oblique structure diversifies water flow

Mesh protector extends the lifespan

# Why Choose Mountain Tree?

- Mountain Tree is committed to making every guest's shopping experience a pleasant one.
- We help every guest to solve your problems.
- For more than a decade, we have **3 million** satisfied customers.

## Your Solution

In recent years, Mountain Tree has actively explored market needs, identifying the most challenging issues faced by fish keepers.

In response, we have developed targeted solutions that address these complex problems with a systematic approach.

This dedication has led to the creation of our Eco Pond Filter and SNG Ecosystem—each designed to help you overcome multifaceted challenges.

Our commitment is to support you in creating and maintaining a continuously healthy aquatic environment.

# *SNG Ecosystem*

*Harmony And Symbiosis*

Welcome to the future of aquaponics with the SNG Ecosystem by Mountain Tree.

Make your living space a vibrant, self-sustaining mini ecosystem where fish and plants thrive together effortlessly.

New Flower

New Fruit

Vegetable are lush  
in several days

## *Why Choose the SNG Ecosystem?*

### **Effortless Care:**

A self-sustaining mini-ecosystem ensures a hassle-free experience.

### **Stress Relief & Healing:**

Eases your anxiety and improves air quality and aesthetics.

### **Easy Installation:**

Quick setup with user-friendly instructions.

### **Safe Materials:**

3C-certified, non-toxic, and eco-friendly.

### **Versatile Use:**

Ideal for homes, offices, schools, hospitals, and cafes.

*Get closer to nature. We are on the way!*

# *Eco Pond Filter*

## *All-in-One Solution for Your Pond*

Transform your fish pond into a crystal-clear oasis with the Eco Pond Filter. Its five chambers purify water, remove particles, break down harmful compounds, add essential minerals, and control bacteria and algae for a healthy fish environment.

## *Why choose the Eco Pond Filter?*

### **High-Quality Materials:**

The system is durable, eco-friendly, and perfect for outdoor use.

### **Space-Saving Design:**

The compact box design ensures easy installation and efficient use of space.

### **Efficient Filtration:**

The five filtration chambers with high-quality filter media create a long-term stable nitrification system.

### **Easy to Customize for Your Needs:**

The system is movable, upgradeable, and customizable to meet your specific needs.

### **Reduce Carbon Footprint:**

High efficiency, low energy consumption, and low failure rates.

# *Our Story*

At Mountain Tree, we don't just provide practical filter media; we offer holistic, all-in-one solutions that encompass everything from pond filters to advanced monitoring systems and filtration to water conditioners. We are deeply committed to resolving all water-related challenges, ensuring that every pond and aquarium thrives in purity and health, just as nature intended.

For every fish lover, in our hearts,  
we find Mountain Tree, forever intertwined.

*We hope that you,  
a fish lover,  
will finally find your sanctuary.*
